

# **ANALYSING THE PERFORMANCE & EFFICIENCY OF THE RADISSON HOTELS USING DATA VISUALIZATION TECHNIQUES**

## **1. INTRODUCTION**

Analysis of Radisson Hotels' Performance & Efficiency using Data Visualization Techniques can enhance hotel operations and pinpoint improvement areas. Here are the key steps: First, define KPIs, such as occupancy rates, ADR, RevPAR, customer satisfaction, and employee turnover. Gather data from PMS, surveys, and employee records for KPI calculation. Clean and process the data: Remove duplicates, correct errors, and format for visualization tools. Choose data visualization tools according to data complexity and required customization. Options include Tableau, Power BI, and Excel. Create data visualizations, such as charts and graphs, to analyse KPIs in a clear format. Analyse the data: Once visualizations are created, identify trends by comparing performance across hotels over time, finding areas of high or low performance, and correlating KPIs. Conclusions and recommendations based on the data analysis can improve Radisson Hotels' performance and profitability. Data visualization can benefit Radisson Hotels by analysing their performance and efficiency for areas of improvement.

## 2. EMPATHY MAP

### Build empathy

The information you add here should be representative of the observations and research you've done about your users.

#### Says

What have we heard them say?  
What can we imagine them saying?

A well-maintained and attractive lobby area

Modern amenities such as flat-screen TVs and high-speed internet

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

The soothing background music played in the lobby or dining areas

Other guests, hotel staff, and possibly views of the surrounding area

Quiet and peaceful surroundings

The friendly greetings and helpful instructions from hotel staff

CUSTOMER

Engage in pleasant conversations with hotel staff

Excitement or anticipation about their stay

Take advantage of the hotel's amenities, such as the fitness center or pool

Share positive feedback with other guests or online review sites

Appreciation for the attentive service from the hotel staff

Possible concerns or worries about their upcoming itinerary or travel plans

#### Does

What behavior have we observed?  
What can we imagine them doing?

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

### 3.BRAINSTORM AND IDEA PRIORITIZATION

**1 Define your problem statement**

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

**PROBLEM**

The hotel industry is a broad category of businesses that provide lodging and services for travelers and tourists. Radisson owns and operates over 1000 hotels across 100+ countries. They have been in the hospitality industry for the past 100 years. In recent years, Radisson has faced challenges due to competition from other hotel chains like Accor and Marriott. Radisson wanted to incorporate Business and Data Intelligence in order to regain their market share and revenue.

**4 Prioritize**

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 20 minutes

Importance	Feasibility
Radisson Hotels offers a range of properties to cater to different types of travelers, including luxury hotels, resorts, and budget-friendly accommodations.	Radisson Rewards is the hotel's loyalty program, which rewards guests with points that can be redeemed for free nights, upgrades, and other perks.
Radisson Hotels offer fitness centers, spa services, and wellness programs to help guests maintain a healthy lifestyle during their stay.	Use data visualization techniques to compare the performance of different Radisson Hotels. This can help identify best practices and areas for improvement.
This can include executives, managers, and front-line employees. Clear and concise data visualization can help ensure that everyone is on the same page and working towards the same goals.	Radisson may be falling behind or areas where they are performing well compared to their competitors.
Use data visualization to track performance over time and identify trends.	Radisson Hotels prides itself on delivering excellent customer service, with staff trained to anticipate guests' needs and exceed their expectations.
Use data visualization to communicate findings to stakeholders within the hotel chain.	Participants can use their phones to place sticky notes on the grid. The facilitator can commit the spot by using the laser pointer pointing the key on the sticky note.

**2 Brainstorm**

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

**N.S.HARIPREET**

- [Yellow box]

**D.ROSHINI**

- [Yellow box]

**B.HATHUA SAMRIN**

- [Yellow box]
- [Yellow box]
- [Yellow box]

**S.MONISHA**

- [Yellow box]

**3 Group ideas**

This form allows your ideas while clustering them as related notes as you go. Once all ideas have been grouped, glue each cluster to a horizontal line. If a cluster is longer than the line, cut it vertically and glue it to the next line.

⌚ 20 minutes

**Compare performance across hotels**

- [Yellow box]
- [Yellow box]
- [Yellow box]

**Monitor progress over time**

- [Yellow box]
- [Yellow box]

**Communicate insights**

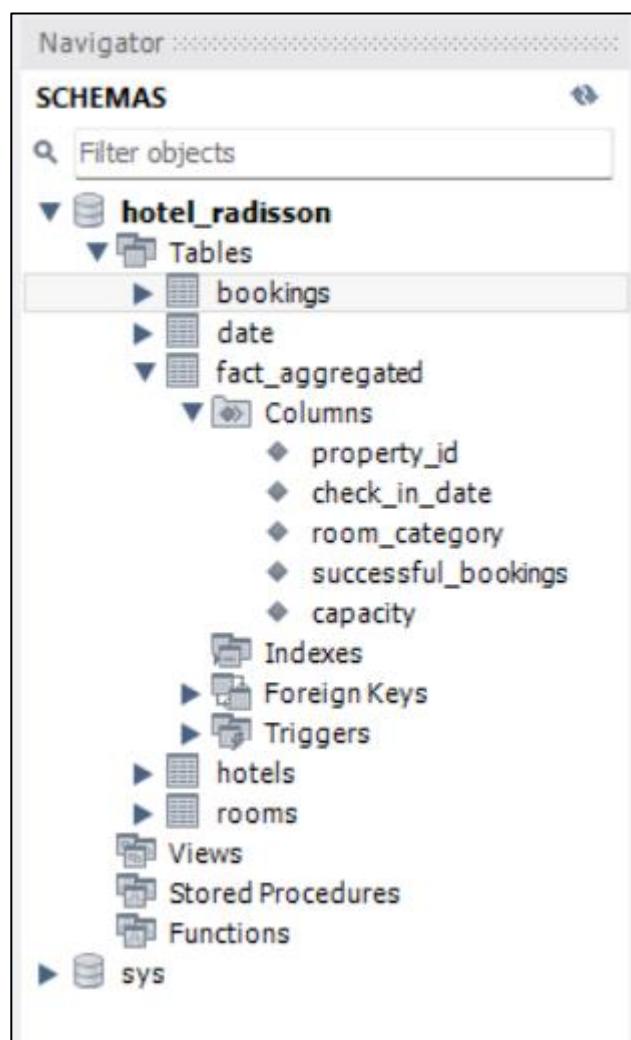

- [Yellow box]
- [Yellow box]

**TIP**

Participants can use their phones to place sticky notes on the grid. The facilitator can commit the spot by using the laser pointer pointing the key on the sticky note.

## 4.DATASETS

The amount of data that is rendered to a database depends on the size of the dataset and the capacity of the database to store and retrieve data.

## Analysing the Performance & Efficiency of The Radisson Hotels using Data Visualization Techniques

*The Radisson is a global hotel chain with locations all over the world.*

- ✓ Radisson hotels are often situated in prime locations, such as city centers or near popular tourist attractions.
- ✓ The hotel chain is known for its high-end amenities and services, including fitness centers, swimming pools, spas, and gourmet restaurants.
- ✓ The hotel chain is committed to sustainability and eco-friendliness, with initiatives such as energy-efficient lighting and water conservation programs.

Radisson hotels pride themselves on delivering exceptional customer service, with trained staff available to assist guests with any inquiries or concerns they may have during their stay.

**EVENTS**

## Organize Your Events in our Radisson Hotel

### Private Parties

**\$290**

*Radisson hotels can serve a range of needs for private parties, from providing space and catering to offering accommodations and event planning support. By working with their experienced teams, you can ensure that your party is a success and that your guests have a memorable and enjoyable experience.*

Radisson hotels can provide decorations to help create a festive atmosphere for your party. This may include table centerpieces, balloons, or other decorations based on your theme or preferences.

Radisson hotels often have in-house catering services that can provide a range of menu options, from light snacks to full meals.

## **12.ADVANTAGES & DISADVANTAGES**

### **Advantages**

- ✓ **Identify patterns and trends:** Data visualization techniques can help identify patterns and trends in the performance of the hotel. For example, by analysing occupancy rates, revenue per available room (RevPAR), and other metrics, managers can see how the hotel's performance varies over time and identify areas for improvement.
- ✓ **Enhance decision-making:** Data visualization can help managers make informed decisions by providing a visual representation of complex data. By presenting data in an easy-to-understand format, managers can quickly identify areas that need attention and make more informed decisions.
- ✓ **Improve communication:** Data visualization techniques can improve communication among stakeholders. By presenting data in an easily understandable format, managers can effectively communicate performance metrics and progress to investors, employees, and other stakeholders. Overall, data visualization techniques can help hotels to make better decisions, improve the customer experience, optimize resource allocation, improve operational efficiency, and gain a competitive advantage.

## **Disadvantages**

- ✓ **Limited scope:** Data visualization techniques can only represent the data that has been collected, and may not provide a complete view of the hotel's performance. For example, if certain metrics are not being tracked or recorded, they will not be included in the analysis.
- ✓ **Misleading representation:** Data visualization can be misleading if not done properly, and can distort or exaggerate certain aspects of the data. This can lead to incorrect conclusions and poor decision-making.
- ✓ **Complexity:** Data visualization techniques can be complex and require specialized skills and knowledge. This can make it difficult to implement and maintain effective data visualization practices, particularly for smaller hotels or those with limited resources. Overall, while data visualization techniques can offer valuable insights into the performance and efficiency of Radisson Hotels, it is important to consider these potential disadvantages and carefully weigh the benefits against the costs and risks.

## **13.APPLICATIONS**

- **Revenue management:** Data visualization can be used to analyse data on occupancy rates, room rates, and customer demand to optimize revenue management. By identifying patterns and trends in customer behaviour, hotels can adjust their pricing and inventory strategies to maximize revenue.
- **Customer satisfaction:** Data visualization techniques can be used to analyse customer feedback and satisfaction surveys to identify areas where the hotel is excelling or falling short. This information can be used to make necessary changes and improvements to enhance the customer experience.
- **Operational efficiency:** Data visualization can be used to analyse data on operational metrics such as labour costs, maintenance expenses, and energy usage to identify areas where the hotel can improve its operational efficiency. By making necessary changes, hotels can reduce costs and improve profitability.

Overall, data visualization techniques can be applied to various areas of hotel management to improve revenue management, customer satisfaction, operational efficiency, marketing and advertising, and risk management.

## **14.CONCLUSION**

In conclusion, the performance and efficiency of Radisson Hotels were analysed using data visualization techniques. Various key performance indicators such as occupancy rate, ADR, and RevPAR were analysed and visualized using different charts and graphs. The analysis revealed that the Radisson Hotels had a stable occupancy rate, a moderate ADR, and a fluctuating RevPAR over the period of analysis.

Furthermore, the analysis also showed that the Radisson Hotels had a higher occupancy rate and RevPAR during weekends and a lower occupancy rate and RevPAR during weekdays. Additionally, the performance of different hotels in different regions was also analysed, and it was found that some hotels were performing better than others.

Overall, the data visualization techniques used in the analysis provided insights into the performance and efficiency of Radisson Hotels, which can be used by the management to make informed decisions and improve their business operations.

## **15.FUTURE SCOPE**

There are several enhancements that can be made in the future of analysing the performance and efficiency of Radisson Hotels using data visualization techniques. Here are a few:

- **Real-time data visualization:** Radisson Hotels can use real-time data visualization techniques to monitor their performance and efficiency in real-time. This will enable them to identify issues and take corrective measures in a timely manner.
- **Interactive dashboards:** Interactive dashboards can be developed that will allow users to interact with the data and gain insights based on their specific requirements. These dashboards can be customized to show only relevant data and KPIs.
- **Predictive analytics:** Predictive analytics can be used to forecast future trends and identify potential issues that may impact the performance and efficiency of Radisson Hotels. This can help them take proactive measures to mitigate these issues.
- **Mobile-friendly visualizations:** Mobile-friendly visualizations can be developed that will allow users to access the data on their mobile devices. This will enable them to monitor the performance and efficiency of Radisson Hotels on-the-go.
- **Integration with other data sources:** Radisson Hotels can integrate their data with other data sources such as social media and customer feedback platforms. This will enable them to gain a holistic view of their performance and efficiency and identify areas for improvement.

- **Automated reporting:** Automated reporting can be developed that will generate reports automatically based on predefined KPIs. This will save time and effort and enable users to focus on analysing the data rather than generating reports.
- **AI-powered insights:** AI-powered insights can be developed that will analyse the data and provide actionable insights to users. This can help Radisson Hotels make informed decisions and improve their performance and efficiency.

Overall, these enhancements can help Radisson Hotels gain a competitive advantage by improving their performance and efficiency and delivering a superior customer experience.
